

EVALUATION BEYOND MEASUREMENT

– look at competences from a Waldorf point of view –

An English – Hungarian bilingual Quality Care Conference in **Budapest Town Hall** (62-65 Váci utca, Budapest 1056) from Friday, **19th September 2008. 19.00** hours until Saturday, **20th September 2008. 17.00** hours, organised by the European Council for Steiner Waldorf Education and the Hungarian Waldorf Fellowship

Why Competences?

Taking care of quality in an institution is usually about the development of structures and processes. The question being: how can we do our job better?

Most of us have some kind of experience or ideas about Quality Care through our trainings, guide-line definitions, documentation and of course the practice of evaluation in our institutions .

But, what/how do we need to evaluate? How can we really see if our job is better or not?

These questions are not just about the schools and kindergartens, they are about the pedagogy itself. That is why we should think about them together.

So we invite you to work with us – this time not on the forms, but – **on the content of the Quality Care within Steiner/Waldorf Pedagogy.**

The aim of the conference is to share information about new and alternative ways of pedagogical evaluation to

- see and to make visible our values and mistakes
- show effective solutions to the outer world as well
- work together on these questions on a national and international level

The Keynote speakers on Friday are Ildikó Balázs (H) and Ákos Kökényi (H).

The lectures on Saturday are: Portfolios - a new way of evaluation in the upper school by Dr. Thilo Koch (D), Looking at evaluation in Waldorf kindergartens and beyond by Trevor Mephram (UK), The Competence based Waldorf Curriculum in Norway by Dagny Ringheim (N), Social and Emotional Competences by Christopher Clouder (UK).

After the lectures we will have possibility to work together in small groups. The lectures and contributions will be translated from English to Hungarian and vice-versa.
